

Project reporting. Made clear.

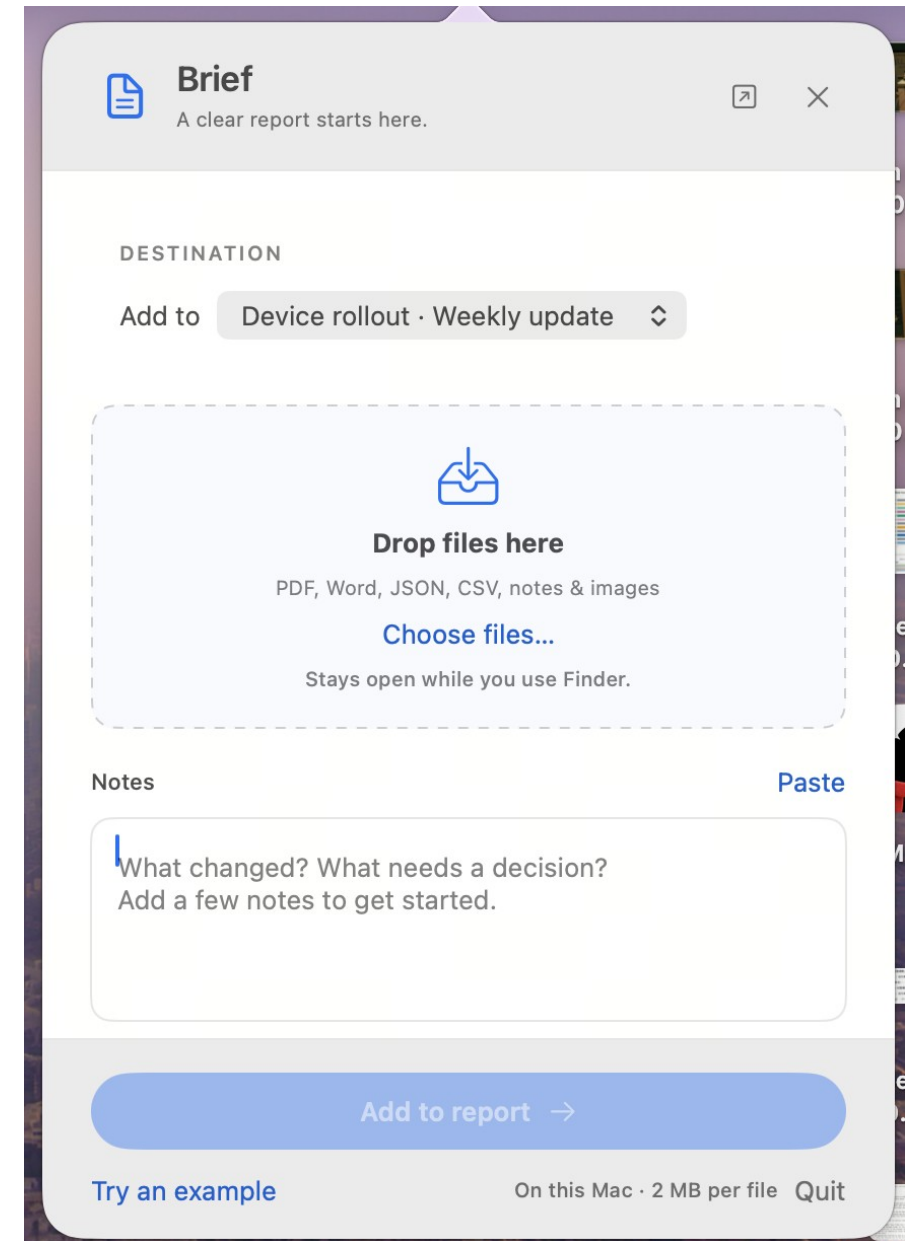

From scattered material to a shared understanding.

Apple IS&T interview · macOS reporting tool

Reporting, close to your work

One place to edit and update reports.
Less switching between websites.

Choose the destination report.
Drop files from Finder or paste notes.
Keep Brief open while you work.

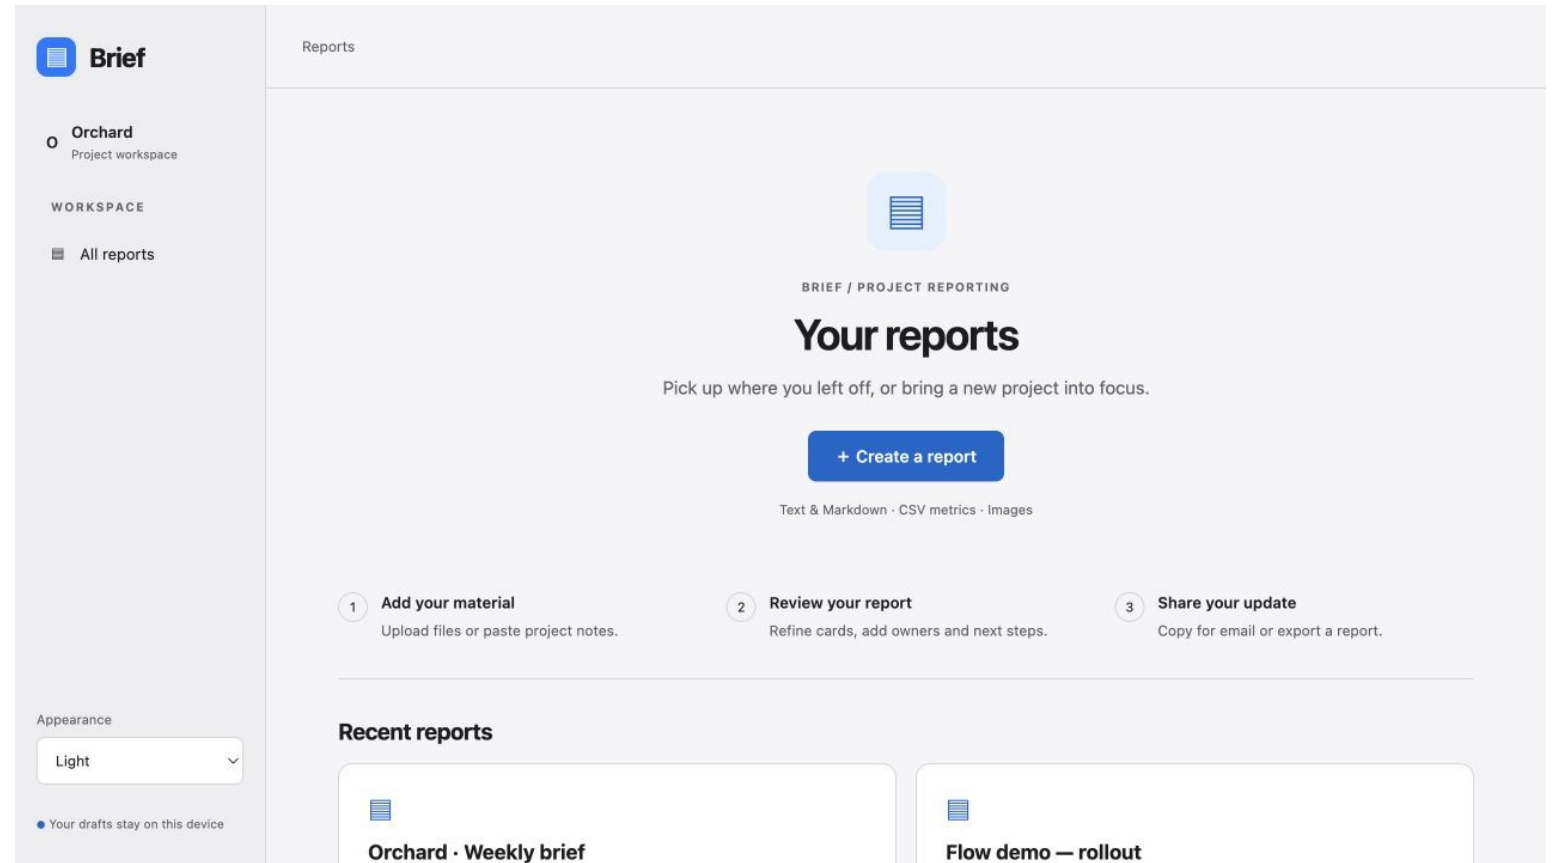

A clear beginning. A focused next step.

Add material

Review the report

Share the update

Bring the pieces. Keep the structure.

Text & Markdown
CSV metrics
PNG, JPG & WebP

Editable updates, metrics,
decisions and image cards.

The screenshot displays the 'Brief' application interface. On the left is a sidebar with a 'Brief' header and a list of items: 'Orchard' (Project workspace), 'WORKSPACE', and 'All reports'. At the bottom of the sidebar is an 'Appearance' section with a 'Light' theme selector and a note: 'Your drafts stay on this device'. The main content area is titled 'Reports / Add material' and shows 'STEP 1 OF 2' with a link to 'ADD MATERIAL → REVIEW REPORT'. The primary instruction is 'Add the pieces.' followed by the text 'Bring in your notes, numbers, and screenshots. We'll organize them into editable cards.' Below this is a dropdown menu asking 'Where should this material go?' with the selected option 'Add to: Orchard · Weekly brief'. A note states: 'New cards will be appended. Existing cards and edits stay unchanged.' A large dashed box contains an upload icon and the text 'Choose files or drop them here', with supported formats listed: 'TXT, Markdown, CSV, PNG, JPG, WebP · up to 2 MB per file'. At the bottom of this box are 'Choose Files' and 'No file chosen' buttons. Below the dashed box, it says 'CSV columns: title, value, target. PDF and Word are not supported yet.' and 'No material added yet'. At the very bottom, there is a button labeled '► Or paste project notes'.

Leadership
Decisions first

The screenshot displays the Orchard Reports interface. On the left is a sidebar with a 'Brief' icon and a list of items: 'Orchard' (Project workspace), 'All reports' (Workspace), 'Report' (selected), 'People & actions' (1), and 'Manage people'. Below this is an 'Appearance' section with a 'Light' theme selected and a note: 'Your drafts stay on this device'. The main content area is titled 'Reports / Orchard · Weekly brief' and includes buttons for '+ Add material', 'Translate', 'Sources', 'Preview', and 'Share...'. The report itself is titled 'Report' and is described as 'A shared view of progress, decisions, and the people behind them.' It shows a 'Compose' section with 'People & actions' and a 'Local draft' status. The 'Audience' is set to 'Leadership · decisions first', with a note: 'Decisions first, then metrics. All cards are included.' The report content includes a 'Orchard · Weekly brief' section for 'October 2–8, 2026 · Week 41' with '4 snippet cards'. One card is titled 'DECISION NEEDED' and contains the text: 'A little support to cross the finish line. Approve two additional support engineers for the final rollout wave. @Maya Chen will coordinate the handoff.' Below this is a 'BY THE NUMBERS' section titled 'Device rollout is moving forward'. On the right side of the interface is a 'Review' panel with a 'Review before sharing' section that says '1 small detail to make your brief more useful.' and a button 'Add a decision deadline'. Below this is a 'PEOPLE IN THIS BRIEF' section listing: 'Maya Chen' (Program lead · 1 card), 'Alex Morgan' (Engineering · 1 card), and 'Jordan Lee' (Design · 1 card).

**A global team.
One obvious action.**
